

COVID-19 Screening Form for Research Participants Campus IRB Studies

Directions: Research staff are responsible for screening all research participants that are involved in in-person activities. For all studies approved for in-person research visits that will NOT take place on Duke premises, participants should be called in advance for over the phone pre-screening. If the contact with the participant will only be remote/virtual and there will be no person-person contact with the participant, a screening is not required.

Please ask each participant each of the following questions.

1. In the last month, have you been in contact with someone who was confirmed or suspected to have Coronavirus / COVID-19?
2. In the last 14 days, have you had a COVID-19 test and are under quarantine?
3. Do you have any symptoms of flu-like illness or upper respiratory illness? New onset in the last 10 days of any of the following symptoms: Runny nose, sore throat, cough, shortness of breath, severe headache, fever, muscle aches, fatigue, loss of taste or smell or any GI symptoms (nausea, vomiting, diarrhea)?

If the participant answers NO to the above questions, their screen is considered negative. Instruct the participant to call the research team immediately if they develop symptoms before coming for their in-person research visit.

If the participant answers YES to any of the questions, their screen is considered positive.

If participant screens positive, instruct the participant to contact their PCP immediately. If the research participant does not have a PCP, provide the participants with the North Carolina COVID-19 Hotline: 866-462-3821 (open 24 hours, seven days a week) or their local health department

COVID 19 hotline numbers:

- Durham County residents: 919-635-8150
- Orange County residents: 919-245-6111
- Wake County residents: 919-856-7044

At any time, the participant may also contact the NC Department of Public Health Communicable Disease Branch 24/7 Hotline at 919-733-3419
